Slims7 (Landing Page):

The screenshot shows the landing page of the Slims7 Open Source Library Management System. The page has a dark blue header with the library's name and logo. Below the header is a red banner with a notification: "There is currently 42 library members having overdue. Please check at Circulation module at Overdues section for more detail". The main content area is white and features a grid of nine modules, each with an icon and a brief description:

- Bibliography**: The Bibliography module lets you manage your library bibliographical data. It also include collection items management to manage a copies of your library collection so it can be used in library circulation.
- Circulation**: The Circulation module is used for doing library circulation transaction such as collection loans and return. In this module you can also create loan rules that will be used in loan transaction process.
- Membership**: The Membership module lets you manage library members such adding, updating and also removing. you can also manage membership type in this module.
- Stock Take**: The Stock Take module is the easy way to do Stock Opname for your library collections. Follow several steps that ease your pain in Stock Opname process.
- Serial Control**: Serial Control module help you manage library's serial publication subscription. You can track issues for each subscription.
- Reporting**: Reporting lets you view various type of reports regarding membership data, circulation data and bibliographic data. All compiled on-the-fly from current library database.
- Master File**: The Master File modules lets you manage referential data that will be used by another modules. It include Authority File management such as Authority, Subject/Topic List, GMD and other data.
- System**: The System module is used to configure application globally, manage index, manage librarian, and also backup database.

At the bottom of the page is a dark blue navigation bar with the following links: Home, OPAC, Bibliography, Circulation, Membership, Master File, Stock Take, System, Reporting, Serial Control, and LOGOUT.
